Operating System	Supported	Recommended	Supported	Recommended	Supported	Recommended
	Windows Vista Business/Ultimate/Enterprise (32-bit or 64-bit) SP2, Windows 7 Prof./Ultimate/Enterprise (32-bit or 64-bit) SP1 ³ , Windows 8 Pro (32-bit or 64-bit) ³ , Mac OS X 10.5 Intel 64-bit/OS X 10.6/OS X 10.7/OS X 10.8/OS X 10.9 ⁴	Windows 7 Prof./Ultimate/Enterprise (32-bit or 64-bit) SP1 ³ , Windows 8 Pro (32-bit or 64-bit) ³ , Mac OS X 10.6/OS X 10.7/OS X 10.8/OS X 10.9 ⁴	Windows Vista Business/Ultimate/Enterprise (32-bit or 64-bit) SP2, Windows 7 Prof./Ultimate/Enterprise (32-bit or 64-bit) SP1 ³ , Windows 8 Pro (32-bit or 64-bit) ³ , Mac OS X 10.5 Intel 64-bit/OS X 10.6/OS X 10.7/OS X 10.8/OS X 10.9 ⁴	Windows 7 Prof./Ultimate/Enterprise (32-bit or 64-bit) SP1 ³ , Windows 8 Pro (32-bit or 64-bit) ³ , Mac OS X 10.6/OS X 10.7/OS X 10.8/OS X 10.9 ⁴	Windows Vista Business/Ultimate/Enterprise (32-bit or 64-bit) SP2, Windows 7 Prof./Ultimate/Enterprise (32-bit or 64-bit) SP1 ³ , Windows 8 Pro (32-bit or 64-bit) ³ , Windows Server 2003 Standard/Enterprise/Datacenter (32-bit or 64-bit) SP2, Windows Server 2008 (Longhorn) Standard/Enterprise/Datacenter (32-bit or 64-bit) SP2, Windows 2008 R2 Standard/Enterprise/Datacenter (64-bit) SP2, Mac OS X 10.5 Intel 64-bit/OS X 10.6/OS X 10.7/OS X 10.8/OS X 10.9 ^{1,4} , Ubuntu 10.04/12.04 LTS Server ² , SuSE SLES 11 SP3 ²	Windows Server 2008 (Longhorn) Standard/Enterprise/Datacenter (32-bit or 64-bit) SP2, Windows 2008 R2 Standard/Enterprise/Datacenter (64-bit) SP2, Mac OS X 10.6/OS X 10.7/OS X 10.8/OS X 10.9 ^{1,4} , Ubuntu 12.04 LTS Server ² , SuSE SLES 11 SP3 ²

Further requirements for all components

Specified for computer systems running astraira in addition to standard office software. If further high performance software applications are to be used on the same hardware, please contact our support for clarification.

Backup: local backup service or network backup service

Supported database systems: Sybase SQL Anywhere 11 (recommended), Microsoft SQL Server 2008/2008 R2 (limited support by astraira), Oracle 10 – 11g (limited support by astraira)

Remote access: Stable broadband internet connection for TeamViewer™ access

¹ Mac OS support: DICOM services not yet supported for Mac OS X, but full software support otherwise

² Linux distributions: Service contract by Canonical or Novell is recommended

³ By default, astraira setup installs a 32 bit version of java (working under 64bit systems). Please contact support for information about installation of java 64 bit.

⁴ Java for OS X is no longer installed by default on OS X. The system will propose to install it automatically at first start of astraira. A live internet connection will be necessary to obtain it during installation.
